**FOR IMMEDIATE RELEASE**

**Two Chase Bank Locations Completed by J.L. Wallace**

FORT MYERS, FLA. (March 19, 2012) – As JP Morgan/Chase Bank continues to expand its presence in southwest Florida, the bank’s customers in Sarasota and Port Charlotte now have an additional location for their banking business.

J.L. Wallace, Inc. has completed construction of two new Chase Bank branches – one at 24143 Peachland Blvd., Port Charlotte, and one at 8373 Lockwood Ridge Road, Sarasota.

Each branch office consists of a concrete-masonry structure of just under 4,300 SF with a single-ply roofing system supported by wood trusses. Four drive-through lanes are covered by a structural steel canopy. The exterior of the building features an insulating stucco finish and precast stone wainscot.

Inside, the bank has six teller stations for serving customers plus an additional nine work stations created by a modular furniture system. The project also included site work, site utilities, storm drainage, asphalt paving, curbing, and landscaping.

Architectural design services for both locations were provided by BDG Architects of Tampa. These two Chase Banks are part of five total branches that J.L. Wallace has completed for the company.

Based in Fort Myers, Fla., J.L. Wallace has provided general contracting, design/build and construction management services in southwest Florida since 1997. The company specializes in commercial projects, including structures for retail, industrial, institutional and office use.
