J.L. Wallace, Inc. Completes USDA Project

FORT MYERS, FL. (January 10, 2013) – J.L. Wallace, Inc. has completed an interior build-out for the United States Department of Agriculture at 5691 Country Lakes Drive in Ft. Myers.

The USDA's new Fort Myers office will house two departments; the animal plant health inspection services and plant protection and quarantine. One of the major undertakings of the office is the Citrus Health Program, which helps ensure local citrus grower's products get to the markets. Monitoring and exclusion of exotic pests that pose threats to the local agriculture is a primary focus of this office. J.L.Wallace is pleased to be part of the construction team that helped build this vital office to support our local citrus growers.

The build-out consisted of 7,000 square feet and is a LEED Silver qualifying project. Highly energy efficient HVAC equipment, LED lighting, windows and appliances were specified along with a host of environmentally friendly building materials for this technologically advanced office space. This project is just one of many where J.L. Wallace has built the original shell structure, and later provided construction solutions for an owner and tenant with very specific needs.

Brian Cappucci served as Project Manager with Ken Furtado as Superintendent and Noel Miranda as Project Manager Assistant. Robert Massengale was the architect with engineering services provided by Stafford Engineering.

Based in Fort Myers, Fla., J.L. Wallace has provided general contracting, design/build and construction management services in Southwest Florida since 1997. The company specializes in commercial projects, including structures for retail, industrial, institutional and office use. For more information, visit www.jlwallaceinc.com or call (239) 437-1111.
